Drainage Care

The highly functional dressings as alternatives to gauze, the basic sanitary material, enable effective extracorporeal absorption and accumulation of drainage and promote patients’ early recovery and efficiency of drainage care.

Function and Selection of the Products for Drainage Care

- **High Absorbent Pad**
  - DERMA AID
- **Absorbent Pad**
  - SD PAD

**Pouch Drainage**

“Pouch Drainage System” established on the concept of “from gauze to pouch” provides a new solution for after-operative drainage care.

- **SURGIDRAIN OPEN-TOP**
- **SURGIDRAIN ZIPPER**
- **WELLCARE DRAIN**

**Solutions for Nursing Treatment**

1. Reduction of Exchange Frequency
   - Gauze: Daily Exchange
   - Pouch: Continuous Application for 3-5 days
2. Accurate Observation
   - Easy observation of the property/volume in the pouch
3. Minimized Skin Irritation
   - Minimized skin irritation by preventing drainage from direct skin contact
4. Economy
   - Reduction of total cost

**Solutions for Patients**

1. Good Sleep
   - Having a good sleep by unnecessary gauze exchange
2. Comfort
   - Minimizing discomfort by preventing drainage from direct skin contact
3. Early Ambulation
   - No interference of body movement by the unique pouch

**Efficiency of Treatment**

- **Gauze**
  - Absorption
  - Coverage/Protection
- **High Absorbent Pad**
  - Increased Absorption
  - Non-Adherence
- ** Patients’ QOL**
### Drainage Care Products

**Water-Proof / Drip-Proof**

- **Surgidrain Open-Top**
  - Drainage after Operation
  - By opening and closing the domed cap, it is possible to observe and treat the wound without removing the appliance.
  - The domed cap can protect the wound from the external impact.
  - A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

- **Surgidrain Zipper**
  - Drainage after Operation
  - By opening and closing the zipper, it is possible to observe and treat the wound without removing the appliance.
  - The flat form enables better fitting to body contours and reduces uncomfortable feeling during application.
  - A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

**Wellcare Drain**

- Fistula Drainage
  - The thin flexible skin barrier for fistula has high pH buffering ability.
  - The viscous drainage can be removed through the soft pouch by milking the pouch.
  - The stick-type skin barrier is enough flexible to be freely molded.
  - The stick-type skin barrier flexibly fits the skin without causing stress on the PEG kit.

### Drainage Bag

**Drainage Bag**

- Bag for Drainage
  - This bag can be connected to ALCARE’s drainage pouches by simple handling and be used for accumulation of a large volume of drainage.

**Accessory**

- **Connect Cone**
  - Catheter Fixer
  - Enable a secure fix of a catheter.
  - Made from a flexible material which prevents the catheter from bending or twisting.

### Absorbent Pad

**Derma Aid**

- Absorbent Pad for Wound
  - 16 times the absorption power of gauze. Can be used on high exudates wounds.
  - Non-adhesive film on both sides of the dressing prevents damage to new cell growth when removed.
  - Each pad/pack is sterilized.

### Drainage Pad

**Surgidrain Open-Top**

- Drainage after Operation
  - By opening and closing the domed cap, it is possible to observe and treat the wound without removing the appliance.
  - The domed cap can protect the wound from the external impact.
  - A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

**Surgidrain Zipper**

- Drainage after Operation
  - By opening and closing the zipper, it is possible to observe and treat the wound without removing the appliance.
  - The flat form enables better fitting to body contours and reduces uncomfortable feeling during application.
  - A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

**Wellcare Drain**

- Fistula Drainage
  - The thin flexible skin barrier for fistula has high pH buffering ability.
  - The viscous drainage can be removed through the soft pouch by milking the pouch.
  - The stick-type skin barrier is enough flexible to be freely molded.
  - The stick-type skin barrier flexibly fits the skin without causing stress on the PEG kit.

### Skin Barrier for Post-PEG Treatment

**Procare Powder**

- Powder Skin Barrier (Karaya Gum + Citrus Pectin)
  - This is a mixed-type powder made of karaya gum and citrus pectin which are both excellent in their skin protecting quality.
  - It fills the gap between the skin and the pouch to reduce unpleasant feeling.
  - It is easy to apply, even to a small gap. The powder offers excellent water absorption.

**Procare Soft Wafer Stick**

- Wafer Skin Barrier (Karaya Gum + Citrus Pectin)
  - This stick-type skin barrier is enough flexible to be freely molded.
  - The stick-type skin barrier flexibly fits the skin without causing stress on the PEG kit.

**PEG Care**

- Skin Barrier for Post-PEG Treatment
  - This thin skin barrier flexibly fits the skin without causing stress on the PEG kit.
  - The skin barrier having the excellent pH buffering ability can effectively control exudates.
For the medical staff and the patients who seek for Best Medical Care, ALCARE takes a proactive stance on a broad range of issues in various clinical fields.

**Wound Care Solution**
- Providing optimum materials for prevention and treatment
- Hydrocolloid Wound Dressing (KARAVIHEAVISY), Drainage after Operation (SURGIDRAIN ZIPPER), Pad Attached Air Permeable Waterproof Film Dressing (MULTI FIX PAD)

**Compression & Graduation Care Solution**
- Pursuing a total support of blood flow care
- Compression & Graduation Care Solution (REGUARD SKIN CARE)
- Medical Stocking (ANSILK-2 PANTY HOSE), 100% Cotton Elastic Bandage (ELASCLAST), Pad for Compression (DG PAD), Medical Stocking (ANSILK PRO J CALF STOCKINGS)

**Bandage Care Solution**
- Realizing best care by providing a large variety of products
- Spandex Elastic Bandage (HIGHSPAN), Elastic Hot Bandage (PRESNET), Elastic Adhesive Bandage (ELATEX), Flexible Adhesive Gauze Bandage (SILKYPORE), Air Permeable Waterproof Elastic Adhesive Bandage (DERMAPORE)

**During / After Operation Management Solution**
- Pursuing of promotion of patient’s early recovery and treatment efficiency
- During / After Operation Management Solution
- Hydrocolloid Wound Dressing (KARAVIHEAVISY), Drainage after Operation (SURGIDRAIN ZIPPER), Pad Attached Air Permeable Waterproof Film Dressing (MULTI FIX PAD)

**ALCARE’s “Solution”**
for all the people hoping for health

**ALCARE Solution** for all the people hoping for health

**Stoma Care Solution**
- Improving patients’ QOL by providing better continence care
- Optimum products for the period from treatment to rehabilitation
- Male Incontinence Appliances (YUNISON), Male Incontinence Appliance (LEG BAG)

**Incontinence Care Solution**
- Protecting athletes from being injured
- Optimum products for the period from treatment to rehabilitation
- Glass Fiber Casting Tape (CASTLIGHT), Plaster of Paris Bandage (PLASPLUN), Water-Activated Glass Fiber Splint (LIGHT SPLINT), Sports Care Solution

**Orthopedic Care Solution**
- Glass Fiber Casting Tape (CASTLIGHT), Plaster of Paris Bandage (PLASPLUN), Water-Activated Glass Fiber Splint (LIGHT SPLINT)

**Sports Care Solution**
- Supporting improvement of ostomates’ QOL
- One-Piece Ostomy System (YOUCARE D), Two-Piece Ostomy System (PROCARE 2 FA, PROCARE 2 C)

**Realizing best care by providing a large variety of products**
- Realizing best care by providing a large variety of products
- One-Piece Ostomy System (YOUCARE D), Two-Piece Ostomy System (PROCARE 2 FA, PROCARE 2 C)

**Supporting improvement of ostomates’ QOL**
- Supporting improvement of ostomates’ QOL
- Drainage after Operation Management Solution (SURGIDRAIN ZIPPER), Pad Attached Air Permeable Waterproof Film Dressing (MULTI FIX PAD)
