Stoma Care Solution

Supporting improvement of ostomates' QOL
Before, During and After operation
until their social rehabilitation

Blood Flow Care
Wound Care
Drainage Care
Stoma Care
Providing best care for all the people hoping for health
Innovative Solutions for Best Care

ALCARE bridges between medical care and people, actively addresses
the challenges existing between them and creates new values.
The half-century history of ALCARE is a series of technological progress and
challenge of product development based on the fundamental principle of customer loyalty.

ALCARE now attempts to reach the next stage with the concept of truly affluent
medical and welfare society leading to a better future in mind.
Under the corporate message, "Innovative Solutions for Best Care ",
ALCARE proposes really innovative solutions to create best care
for all the people that provide medical care, need medical care and
hope for promotion of health.

ALCARE is actively involved in solutions in the following fields:

- Supporting Improvement of ostomates' QOL
- Stoma Care Solution
  - During / After Operation Management Solution
  - Wound Care Solution
  - Compression & Gradation Care Solution
  - Bandage Care Solution
  - Orthopedic Care Solution
  - Sports Care Solution

ALCARE keeps challenging to achieve our dream.

Realization of Active Life for Ostomates

Stoma Care Solution

Since 1965 when "LAPACK" was launched as the first ostomy appliance manufactured in Japan, ALCARe, a stoma care pioneer, has served medical needs and ostomates' demands and made the most of its unique technology to develop and provide various products.

ALCARe continues supplying the optimum solutions to meet a large variety of practical needs in the treatment following ostomy and urinary diversion. ALCARe also provides total stoma care solutions before, during and after operation through social rehabilitation to improve ostomates' QOL and realize their active life.

**Information Icon**

The icons used in this catalogue are listed below. Refer to the icons when you find a product with it:

- **EOG Sterilized**: It can be used in an operating room.
- **X-ray Sterilized**: It can be used in an operating room.
- **Hypoallergenic Adhesive**: The skin-friendly hypoa allergic acrylic adhesive.
- **Non-Adherent Pad**: The adhesive part of the pad can not adhere to the wound surface.
- **Water-Proof / Drip-Proof**: The waterproof and drip-proof structure prevents contamination from outside.
- **Anatomical bag and a face plate are integrated into a one-piece appliance**.
- **An ostomy bag and a face plate are separated**.
- **Convex Type**
- **Safety Plate**
- **Post-Cut**
- **Free-End**
- **Open-Ended Type**
- **Closed-Ended Type**
- **Soft for Rotary Bag**
- **Soft for Valve"
Blood Flow Care

More safety, easily, and comfortably ——
Stagnation of the blood flow in the lower extremities during lying and rest is effectively prevented and the venous reflux is supported.

Corresponding to various needs and body shapes, the products line provides more appropriate venous return condition.

Composition & Gradation Care: Supporting venous return

Compression and Gradation care is a concept of care which ALCARE proposes. It can be achieved by composition and continuous changes of compression gradation.

Compression Design of ANSILK-PRO J

The three-dimensional structure fitting to the shape of leg and the compression design providing the optimum pressure according to Sigel theory* (80% increase in blood flow during rest) so it constantly gives adequate compression during lying.

Continuous Changes of Compression
Venous Blood Flow

Quality of ANSILK-PRO J

Soft touch achievable without using latex
Color lines at the ankle and forehead can be applicable to your appropriate application. (Stocking type only)

Two-way delta stretch reduces the feeling of strong pressure on the thigh and assures comfortable fitting. (Stocking type only)

The "comfort heel" increases the smooth feeling at the heel.

A monitor hole allows observation of blood flow condition.

Medical Stocking

ANSILK-PRO J CALF STOCKINGS

- The calf stocking type causes no uncomfortable feeling and can be used by many people including those who usually wear no stockings.
- The material with soft texture assures comfortable fitting.
- The graduated compression is based on Sigel Theory.

100% Cotton Elastic Bandage

ELASCOT

- 100% cotton elastic bandage has soft touch and excellent absorptivity.
- The original hard twist cotton yarn gives excellent elasticity to the bandage.
- It can be used as a substitute for medical stockings in the case that medical stocking is insufficient.
Wound Care / Drainage Care

Having goals in improvement of patients’ QOL and in nursing treatment, ALCARE provides optimum solutions meeting the clinical needs in after operation wound and drainage care.

A variety of wet dressings for promotion of wound healing by maintaining the wet environment and drainage products to support drainage care are available.

**Dressing**

KARAYAHEIVE
Hydrocolloid Wound Dressing
- Transparency enables follow-up observation of the wound.
- Can not slip even if it is applied to the joints or the parts with uneven surfaces because of appropriate flexibility and adherence.
- Appropriate absorbing exudate reduces maceration of normal skin.

**MULTI FIX-PAD**
Pad Attached Air Permeable / Waterproof Film Dressing
- The flexible backing film enables light application without being wrinkled. Contamination from the outside and the effects of moisture are effectively blocked.
- Once the rayas pad absorbs the exudate, it can prevent it from adhering to the wound surface.
- The transparent adhesive part enables easy observation of the absorbed exudate.

**SURGIDRAIN OPEN-TOP**
Drainage after Operation
- By opening and closing the domed cap, it is possible to observe and treat the wound without removing the appliance.
- The domed cap can protect the wound from the external impact.
- A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

**SURGIDRAIN ZIPPER**
Drainage after Operation
- By opening and closing the zipper, it is possible to observe and treat the wound without removing the appliance.
- The flat form enables better fitting to body contours and reduces uncomfortable feeling during application.
- A piece of drainage pouch can sufficiently manage 3 to 5 days drainage from the drain.

**SD PAD / SD PAD-WP**
Drainage Pad
- The absorptivity is equivalent to about 40 gauze layers and its thickness is about half, which reduces uncomfortable feeling during application.
- A porous polymer absorber quickly absorbs drainage to reduce unpleasant feeling.
- Effective absorption reduces excessive moisture.

After Operation / Social Rehabilitation

Stoma Care

ALCARE considers improvement of ostomates' QOL as its basic theme of our development and has created many unique products; such as the appliances serving for social rehabilitation and safer skin barrier.

Theme of Development
Projects for development of skin barrier that is indispensable for peristomal skin care.

ALCARE uses karaya gum as the main raw material for skin barrier to enhance the skin protecting effects.

Development 1: CMC-Free Skin Barrier
The ingredients of hydrophilic polymer are changed from the combination of karaya gum and CMC to the combination of karaya gum and citrus pectin to improve skin protecting effects.

Development 2: Ants' Nest Structure
"Ants' nest structure" of "Procure Barrier for Uninary Care" enables both preservation of skin protection and excellent fitting.

Development 3: Excellent Buffer Action
"Skin barrier with excellent buffer action" prevents skin irritation resulting from strong alkaline excretion.

Theme of Development: Development of appliances that can be used by the elderly in their self-care processes.

Feature 1: Assurance for Skin Friendly Skincare
The main ingredients of the skin barrier are the natural materials that rarely irritate the skin such as "karaya gum" and "citrus pectin". Karaya gum keeps the surface of the face from acid.

Feature 2: Easy and Simple Handling
Secure Fitting without Difficulty
Aged people having problems in eyes or hands can use YOU CARE 2 Series. The single ring of this series can be fitted smoothly into the groove only by adjusting the two parts and secure fitting is achieved.

YOU CARE Series: One-Piece Ostomy System
YOU CARE 2 Series: Two-Piece Ostomy System

Feature 3: Comfortable Application
No smell, No leakage
Membrane Charcoal Filter
Scientific Analysis of Body Movement

Diamond Shape
Anatomically designed Diamond Shape effectively prevents detachment and leakage by increased flexibility by the curved groove and the abdominal movement. Because of the compact design, the user hardly notices uncomfortable feeling. It offers higher levels of durability and achieves excellent contact.

Comparison of buffer actions on intestinal fluids

Feature 4: Clip-less Ostomy Appliances
Just turn up the plate along with the blue fold up line and secure the end with Velcro closure as attached. Opening and dosing are easy. The keep-shaping plate makes discharge and storing easy.

By folding the keep-shaping plate in V shape, the plate can be kept open.

Comparison of buffer actions on intestinal fluids
Providing a large variety of products based on individual stoma conditions and lifestyles so that ostomates can select optimum ostomy appliances after social rehabilitation.

Skin Barrier

- For filling wrinkles and hollows: PROCARE WAFER
- PROCARE SOFT WAFER RING
- PROCARE SOFT WAFER STICK
- Enhancement of adhesion between face plate and skin: PROCARE PASTE

* Flesh type is also available. * Other ostomy appliances are also available.
Open-Ended Type

POSPACK-K STERILE
Open-Ended Bag for Colostomy / Ileostomy

- The capacious open-ended bag with a large opening for removal is suitable for those who require greater capacity for accumulation of stool.
- A very thin gentle skin barrier is used.
- A thin and durable skin barrier is used.
- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool. (Without filter type is also available.)
- The clip-less bag can provide easy application and reduce uncomfortable feeling during its application.
**One-Piece Ostomy System**

**YOU CARE C (10 pieces/box)**

- The stoma size can be changed immediately after operation and 10 pieces can be enough at this stage. It is recommended as a starter set.

- A convex type face plate is suitable for a flat or a retracted stoma.

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.

- A thick and durable skin barrier is used.

**YOU CARE TDC**

- Thin and durable skin barrier is used.

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.

- The clip-less bag can provide easy application and reduce uncomfortable feeling during its application.

**YOU CARE Dc**

- Thin and durable skin barrier is used.

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

**YOU CARE Cc**

- Very thin skin barrier is used.

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.

- A convex type face plate is suitable for a flat or a retracted stoma.

**PROCARE 1 FREE-CUT D**

- The soft non-woven fabric is attached to both sides of the ostomy bag.

- Application can be completed by checking the position of the stoma from the slit formed on the front side.

**PROCARE 1 PRE-CUT D**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

**PROCARE 1 FREE-CUT C**

- The soft non-woven fabric is attached to both sides of the ostomy bag.

- Application can be completed by checking the position of the stoma from the slit formed on the front side.

**PROCARE 1 PRE-CUT C**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

**PROCARE 1 FREE-CUT Dc**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

- A convex type face plate is suitable for a flat or a retracted stoma.

**PROCARE 1 PRE-CUT Dc**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

- A convex type face plate is suitable for a flat or a retracted stoma.

**ILEFINE (Reostomy Bag)**

- The skin barrier with excellent buffer action prevents skin irritation resulting from strong alkaline secretion.

- The safety plate prevents leakage of watery stool into the face plate.

- D70 Flat face plate with no safety plate.
**One-Piece Ostomy System**

**PEDIATRIC PROCARE 1 POST-OP**

- The open-ended bag with a large opening for removal facilitates peristomal treatment.

**PEDIATRIC PROCARE 1 D**

- The oval face plate cannot interfere with body movement but assures sufficient adhesion.
- The PEDIATRIC TRUNK BELT, P29, is available for more secure application.

**Two-Piece Ostomy System**

**YOUCARE 2 F**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- A convex type face plate is suitable for a flat or retracted stoma.

**YOUCARE 2 Fc**

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.
- The clip-less bag can provide easy application and reduce uncomfortable feeling during its application.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**YOUCARE 2 TDf**

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**YOUCARE 2 Df**

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**YOUCARE 2 TD**

- This system is a drainable bag (open-ended type) without a deodorizing filter.
- The clip-less bag can provide easy application and reduce uncomfortable feeling during its application.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**YOUCARE 2 DI**

- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.
- YOUCARE TRUNK BELT, P29, is available for more secure application.
**Two-Piece Ostomy System**

**YOUCARE 2 D**
- Two-Piece Ostomy System
- This system is a drainable bag (open-ended type) without a deodorizing filter.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**YOUCARE 2 Cf**
- Two-Piece Ostomy System
- The highly functional deodorizing filter enables smooth gas release and prevention of leakage of smell and stool.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**PROCARE 2 F**
- Two-Piece Ostomy System
- A whole skin barrier type is recommendable to those who have sensitive skin.
- Maximum acceptable stoma size up to 69 mm in diameter.
- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

**PROCARE 2 Fa**
- Two-Piece Ostomy System
- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- Free-cut

**PROCARE 2 Fc**
- Two-Piece Ostomy System
- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- Convex type face plate is suitable for a flat or a retracted stoma.
- TRUNK BELT, P29, is available for more secure application.

**YOUCARE TRUNK BELT, P29**
- Available for more secure application.

**PROCARE 2 D**
- Two-Piece Ostomy System
- Two types are available, a transparent type which allows observation of the stool conditions and a flesh color type which obscures its application.

**PROCARE 2 C**
- Two-Piece Ostomy System
- Two types are available, a transparent type which allows observation of the stool conditions and a flesh color type which obscures its application.

ALCARE uses the highly durable skin barrier for urinary care and provides the ostomates with a large variety of products so that they can select according to their stoma conditions and lifestyles.

**One-Piece Ostomy System**

**YOU CARE U**

- The smooth dense thin skin barrier developed specifically for urinary care is used for the face plate.
- The double lock stopper enables simple and easy urinal discharge.
- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.

**YOU CARE Uc**

- The smooth dense thin skin barrier developed specifically for urinary care is used for the face plate.
- The double lock stopper enables simple and easy urinal discharge.
- The oval face plate can not interfere with the body feeling during application.
- YOUCARE TRUNK BELT, P29, is available for more secure application.

**PROCARE 1 PRE-CUT U**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- The single lock stopper enables simple discharge of urine.

**PROCARE 1 FREE-CUT U**

- The soft non-woven fabric is attached to both sides of the bag.
- Application can be completed by checking the position of the stoma from the slit formed on the front side of the non-woven fabric.
- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- The single lock stopper enables simple discharge of urine.

**PROCARE 1 PRE-CUT Uc**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- The single lock stopper enables simple discharge of urine.
- Convex type face plate is suitable for a flat or a retracted stoma.
- TRUNK BELT, P29, is available for more secure application.

**PROCARE 1 FREE-CUT Uc**

- The tape around the face plate prevents maceration and collapse of the margins of the skin barrier during bathing.
- The single lock stopper enables simple discharge of urine.
- Convex type face plate is suitable for a flat or a retracted stoma.
- TRUNK BELT, P29, is available for more secure application.

**PEDIATRIC PROCARE 1 U**

- The oval face plate can not interfere with the body movement but assures sufficient adhesion.
- PEDIATRIC TRUNK BELT, P29, is available for more secure application.

**YOU CARE 2 Fu**

- A whole skin barrier type is recommendable to those who have sensitive skin.
- The thinner margins of the face plate assure close contact with the body and reduces the uncomfortable feeling during application.

**YOU CARE 2 Fuc**

- A convex type face plate is suitable for a flat or a retracted stoma.
- PEDIATRIC TRUNK BELT, P29, is available for more secure application.

MINI CLOSE

Bag for Bathing

- Use of this type of bag is recommended when the volume of excretion is limited such as after irrigation and during bathing.
- A hypo-allergenic adhesive is used for the face plate.
- This small, oval-shaped bag offers a snug fit, allowing free body movement.
- The flesh color film makes the stoma discreet.

YOUCARE 2 BC

Two-Piece Ostomy System

- A compact dome shape suitable for bathing and swimming.
- This plastic dome is highly durable and allows you to wipe off water on the surface.
- The flesh color film makes the stoma discreet.
- This system can be used in combination with the face plate of YOUCARE 2.

PROCARE 2 BC

Two-Piece Ostomy System

- A compact dome shape suitable for bathing and swimming.
- This plastic dome is highly durable and allows you to wipe off water on the surface.
- The flesh color film makes the stoma discreet.
- This system can be used in combination with the face plate of PROCARE 2.

Appliances for Bathing

The compact and indistinctive appliances effectively support the ostomates while they enjoy bathing and swimming.

MINI PAD

Pad for Bathing

- Use of this pad is recommended during bathing or at times when transient protection of the stoma is needed.
- An absorbing pad offering friendly protection of the stoma.
- The flesh color base material makes the stoma discreet.
PROCARE POWDER
Powder Skin Barrier (Karaya Gum + Citrus Pectin)

- This powder fills the gap between the stoma and the face plate, protecting the skin from discharge.
- It is easy to apply, even to a small gap. The powder offers excellent water absorption.

PROCARE WAFER
Wafer Skin Barrier (Karaya Gum + Citrus Pectin)

- It is most suitable for partial use on wrinkles or hollows in the peristomal area.
- A moderately soft wafer that can be molded with the hands (no scissors needed).
- A ring-shaped wafer that is easy to apply to the peristomal skin area.
- A double-sides adhesive wafer that adheres well to the face plate of various appliances.

REMOIS CLEANSE
Skin Moisture Cleansing Cream

- Natural 4-in-1 makes the dirt detach from skin and just wiping off makes the skin clean.
- Cleansing with this cream assures refreshed feeling and ostomy appliances can be applied immediately after wiping off the cream properly.
- Moisturizer added cream will make the skin moist and prevent from dryness.

PROCARE REMOVER
Ostomy Appliance Remover

- It reduces the peeling pain when removing the face plate of ostomy appliances from the skin.
- It can be effectively used when an appliance needs immediate removal.
- It is individually packed in a foil pack.

FLANGE CUTTER
Cutter for Flange

- A starter hole on the flange can be easily made using this FLANGE CUTTER.
- The finished, smooth cut edges of the flange reduce aggravation of the stoma.

PROCARE MF PATE
Paste Skin Barrier (Karaya Gum + Citrus Pectin)

- It fills the gap between the stoma and face plate, protecting the skin from discharge.
- An alcohol-free paste which will not make the skin sting but will remain soft.

PROCARE PASTE
Paste Skin Barrier (Karaya Gum + Citrus Pectin)

- By applying this paste on the inside of the face plate, the adhesion of appliances can be improved.
- A laminate tube keeps the paste moist, making it easy to squeeze the tube down to the last.

PROCARE SOFT WAFER STICK
Wafer Skin Barrier (Karaya Gum + Citrus Pectin)

- It is most suitable for partial use on wrinkles or hollows in the peristomal area.
- An extremely soft wafer that can be freely molded.
- A double-sides adhesive wafer that adheres well to the face plate of various appliances.
- Ideal for application to uneven hard-to-apply surfaces such as the area around the fistula.

ALCARE provides the skin barrier containing the natural raw materials with excellent skin protecting and a large variety of pouch accessories so that the ostomates can enjoy more comfortable daily life.
TRUNK BELT WITH FACE PLATE
Belt for One-Piece Bag

- Provides a securer application, preventing the flange from slipping or falling off with the body movement.
- It is recommendable for active athletes or for those who have difficulty in adhering the appliances to the skin.

</table>

DRAINAGE BAG
Bag for Drainage

- This bag can be connected to SURGIDRAIN Series.
- The bag can be used during sleep by connecting it to ILEFINE D Cap of the bag for watery to soft stool.
- Concomitant use of the drainage bag is recommended in case of watery stool. Its concomitant use in case of muddy to soft stool may block the tube and prevent smooth flow.

<table>

</table>

YOU CARE LEG BAG
Leg Bag for Urinary Bag

- A leg bag that connects with the ostomy bag for an easy and convenient way to increase the capacity of urine collection.
- A leg bag that collects urine at the lower leg and reduces weight on the bag adhesive.
- A non-woven lining on the skin-side of the leg bag absorbs sweat and offers greater wearer comfort.

For the medical staff and the patients who seek for Best Medical Care, ALCARE takes a proactive stance on a broad range of issues in various clinical fields.

Pursuing of promotion of patient’s early recovery and treatment efficiency

**During / After Operation Management Solution**

- Hydrocolloid Wound Dressing (KARAYAHESIVE)
- Drainage after Operation (SURGIDRAIN ZIPPER)
- Pad Absorbent Moisture Permeable (MULTI FIX-RAD)

PIV: Providing optimum materials for prevention and treatment

**Wound Care Solution**

- Alleviant Pad for Wound (DERMA AID)
- Fixation Pad for Decubitus Prevention (BONMAT)

Pursuing a total support of blood flow care

**Compression & Graduation Care Solution**

- Medical Stocking (ANSILK-PRO J CALF STOCKINGS)
- Pad for Compression (COS PAD)
- Medical Stocking (ANSILK PRO J A2 STOCKINGS)

Realizing best care by providing a large variety of products

**Bandage Care Solution**

- Spandex Elastic Bandage (HIGHSPAN)
- Elastic Hot Bandage (PRESNET)
- Elastic Adhesive Bandage (ELATEX)
- Flexible Adhesive Gauze Bandage (SILTOPONE)

**Stoma Care Solution**

Supporting improvement of ostomates’ QOL

- Open-Ended Bag for Colostomy / Ileostomy (LAPACK SUPER G)
- One-Piece Ostomy System (YOUCARE O)
- Two-Piece Ostomy System (PROCARE 2 F, PRO CARE 2 C)

Improving patients’ QOL by providing better continence care

**Incontinence Care Solution**

- Pad for Compression
- Male Incontinence Appliance (YUNION)
- Male Incontinence Appliance (LEG BAG)

Making it possible to perfectly choose through the stage in prevention, treatment and rehabilitation

**Orthopedic Care Solution**

- Glass Fiber Casting Tape (CASTLIGHT-)
- Plaster of Paris Bandage (LIGHT SPLINT)
- Lumbar Supporter (SACRO LIGHT2)

Protecting athletes from being injured

**Sports Care Solution**

- Rib Belt (BUSTBAND ACE)
- Lumbar Supporter (SACRO LIGHT2)
- Sternal Collar (POLYNECK HARD)

100% Cotton Elastic Bandage

**ALCARE’s “Solution” for all the people hoping for health**

**For the medical staff and the patients who seek for Best Medical Care, ALCARE takes a proactive stance on a broad range of issues in various clinical fields.**

Pursuing of promotion of patient’s early recovery and treatment efficiency
