Wound Care Products

**Hydrocolloid Dressing**

**KARAYAHESIVE**

- Hydrocolloid Wound Dressing
- Transparency enables follow-up observation of the wound.
- It can slip even if it is applied to the joints or the parts with uneven surfaces because of appropriate flexibility and adhesiveness.
- Absorbing exudate reduces maceration of normal skin.

**MULTI FIX-PAD**

- Perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- It is available in two colors to suit the application and the afflicted area.

**SILKYPORE DRESSING**

- Adhesive Dressing for Wound Care
- Perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- A gentle adhesive to prevent agitation to even delicate skin.

**DERMAPORE DRESSING**

- Adhesive Dressing for Wound Care
- The air permeability and waterproofing property protects the wound from moisture and dirt.
- A semi-transparent dressing allows inspection of the pad without the need for removal.

**Absorbent Pad**

**DERMA AID**

- Absorbent Pad for Wound
- 18 times the absorption power of gauze. Can be used on high exudates wounds.
- Non-adherent films, which easily adhere to the wound surface, are applied to both sides of the pad.
- Each pad/pack is sterilized.

**Film Dressing**

**MULTI FIX**

- Surgical Film with Air Permeability and Waterproofing Property
- The air permeability and waterproofing property do not permit penetration of water and external contamination.
- Transparent film enables easy follow-up observation of the wound.

**Silkypore DRESSING**

- Adhesive Dressing for Wound Care
- Perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- A moderately soft product which is easily applied to uneven areas of the skin.

**Silkypore**

- Flexible Adhesive Gauze Bandage
- A perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- A moderately soft product which is easily applied to bending joints.
- Available in two colors to suit the application and the affected area.

**Fixation Material**

**DERMAPORE**

- Air Permeable Waterproof Elastic Adhesive Bandage
- The air permeability and waterproofing property do not permit penetration of water and external contamination.
- The extra thin bandage fits uneven sites because of its excellent elasticity in semi-direction.
- A semi-transparent film enables easy follow-up observation of the exudate.
For the medical staff and the patients who seek for Best Medical Care, ALCARE takes a proactive stance on a broad range of issues in various clinical fields.

**ALCARE’s “Solution”**
for all the people hoping for health

During / After Operation Management Solution

- Hydrocolloid Wound Dressing (KARAYAHEMISIVE)
- Drainage after Operation (SURGIDRAIN ZIPPER)
- Adhesive Dressing for Wound Care (SILKYPURE DRESSING)
- Pad Attached Air Permeable Waterproof Film Dressing (MULTI FIX-PAQ)

Wound Care Solution

- Absorbent Pad for Wound (DERMA AID)
- Floatation Pad for Decubitus Prevention (BONMAT)

Compression & Graduation Care Solution

- Medical Stocking (ANSILK-PRO J CALF STOCKINGS)
- 100% Cotton Elastic Bandage (ELASCOT)
- Pad for Compression (ELATEX)

**Stoma Care Solution**

Supporting improvement of ostomates’ QOL

- Open-Ended Bag for Colostomy / Ileostomy (LOOKPACK SUPER G)
- Open-Ended Bag for Colostomy / Ileostomy (POSPACK-K)
- One-Piece Ostomy System (YOUCARE DI)
- Two-Piece Ostomy System (PROCARE 2 FA, PROCARE 2 C)

Incontinence Care Solution

Improving patients’ QOL by providing better continence care

- Male Incontinence Appliance (YUNISON)
- Male Incontinence Appliance (LEO BAG)

Orthopedic Care Solution

Optimum products for the period from treatment to rehabilitation

- Glass Fiber Casting Tape (CASTLIGHT)
- Plaster of Paris Bandage (PLASPLINT)
- Water-Activated Glass Fiber Splint (LIGHT SPLINT)
- Lumbar Supporter (SACRO LIGHT-DX)
- Rib Belt (BUSTBAND-ACE)

Sports Care Solution

Protecting athletes from being injured

- Ankle Guard EX
- Lumbar Guard
- Knee Guard
- Reguard Skin Care

Bandage Care Solution

Realizing best care by providing a large variety of products

- Elastic Adhesive Bandage (ELATEX)
- Elastic Net Bandage (PRESNET)
- Spandex Elastic Bandage (HIGHSPAN)
- Air Permeable Waterproof Elastic Adhesive Bandage (DERMAPORE)

Pursuing a total support of blood flow care

- Medical Stocking (ANSILK-2 PANTY HOISE)
- 100% Cotton Elastic Bandage (ELASCOT)
- Pad for Compression (ELATEX)

Pursuing of promotion of patient’s early recovery and treatment efficiency

- Hydrocolloid Wound Dressing (KARAYAHEMISIVE)
- Drainage after Operation (SURGIDRAIN ZIPPER)
- Adhesive Dressing for Wound Care (SILKYPURE DRESSING)
- Pad Attached Air Permeable Waterproof Film Dressing (MULTI FIX-PAQ)
