

More Comfortable Stoma Care by Elimination of Anxiety about Odor

Stoma Care Solution

DEOFINE POWDER **NEW**

POWDERY DEODORANT FOR OSTOMATES

〈DEOFINE POWDER〉 is a powdery deodorant for use in ostomy bags.

It inhibits the generation and diffusion of odors with plant ingredient, and makes stoma care more comfortable with a refreshing mint ingredient.

(Actual Size)

With its two odor-eliminating functions, it minimizes odors during stoma care, resolving discomfort and anxiety.

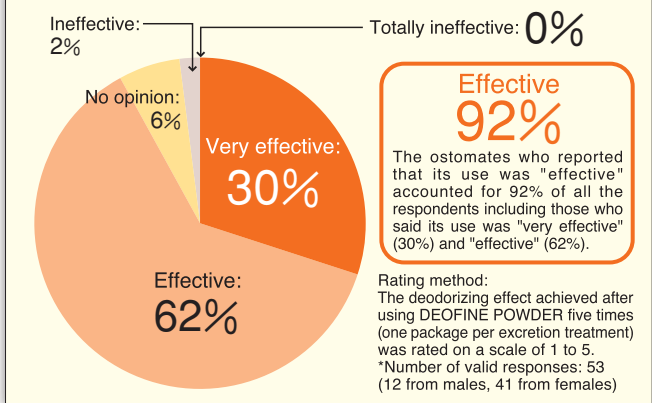

Sensory Deodorization

This special mint ingredient masks annoying odor and makes drainage treatment more pleasant.

Chemical Deodorization

Odorants, which produce odors, are chemically eliminated by chemical reactions with plant ingredient, thus inhibiting the generation and diffusion of odors.

Study Results of Trial Use by Ostomates (Deodorizing Effect)

(Survey by ALCARE Co., Ltd., 2005)

Sustained Deodorizing Effect by Inhibition of Annoying Odors: No More Anxiety

Considerable concern to many ostomates. Ostomates want to lead a comfortable daily life without anxiety about odors. To meet such needs, DEOFINE POWDER has been developed, which produces an immediate deodorizing effect, and the effect lasts longer.

Recommended for ostomates who:

- are worried about odors
- shy away from public places due to worries about odors
- desire refreshing care with more comfort

Powdery deodorizer that immediately attaches to excretion!

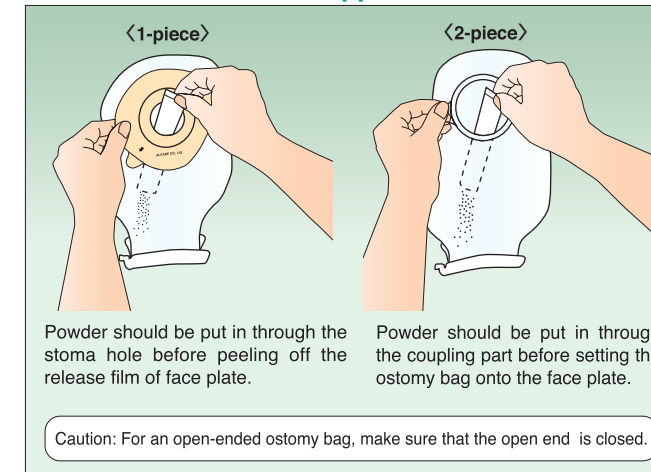

The fine powder spreads in the ostomy bag to deodorize more effectively.

Stick-type individual packaging for convenience and portability.

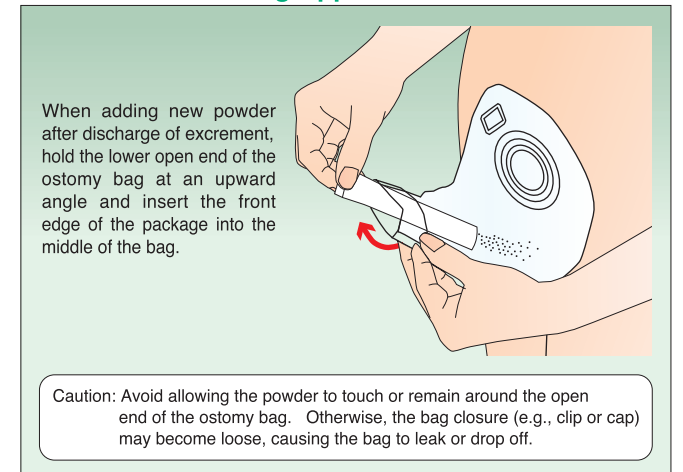

The convenient deodorizer can be easily taken out of the box with one hand.
