Wound Care

After Operation

The highly functional dressings as alternatives to gauze, the basic sanitary material, enable effective treatment, coverage and protection of wounds and promote patients' early recovery and efficiency of wound care.

Functions and Selection of Dressings

Feature Comparison of Dressings

- **KARAYAHESIVE**
  - Providing Wet Environment
  - Forming Blocked Environment
  - Absorptivity
  - Suitability of Continuous Use

- **Film Dressing**
  - Providing Wet Environment
  - Forming Blocked Environment
  - Absorptivity
  - Suitability of Continuous Use

- **Gauze**
  - Providing Wet Environment
  - Forming Blocked Environment
  - Absorptivity
  - Suitability of Continuous Use

Hydrocolloid Dressing

Hydrocolloid dressing (KARAYAHESIVE), developed on the treatment principle of "Moist Wound Healing", provides the optimum environment for after-operative wound healing.

KARAYAHESIVE Blind Type

- Maintaining Wet Environment of Wounds
- Absorption of Exudates
- Indistinguishable Flesh Color

KARAYAHESIVE Clear Type

- Maintaining Wet Environment of Wounds
- Absorption of Exudates
- Transparency

Solution using the dressing for acute wound care (KARAYAHESIVE)

(KARAYAHESIVE) has been developed based on the treatment principle of "Moist Wound Healing". It effectively promotes wound healing by absorbing the exudates from the wounds and maintaining the optimum wet environment for them. The clear type, which allows easy wound observation and reduced frequency of exchanges, contributes to improvement in nursing treatment.

Film Dressing

- MULTI FIX

Functions

- Air Permeability
- Water Proof
- Transparency

Easy
**Wound Care Products**

**Hydrocolloid Dressing**

**KARAYAHESIVE Hydrocolloid Wound Dressing**

- Transparency enables follow-up observation of the wound.
- It can not slip even if it is applied to the joints or the parts with uneven surfaces because of appropriate flexibility and adherence.
- Appropriate absorbing exudate reduces maceration of normal skin.

**Adhesive Island Dressing**

**MULTI FIX-PAD**

- The flexible backing film enables tight application without being wrinkled. Contamination from the outside and the effects of moisture are effectively blocked.
- Once the rayon pad absorbs the exudate, it curls to prevent its pad from adhering to the wound surface.
- The transparent adhesive part enables easy observation of the absorbed exudate.

**Silkyapore Dressing**

Adhesive Dressing for Wound Care

- perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- moderately soft dressing which can be applied to uneven areas of the skin.
- A gentle adhesive to prevent agitation to even delicate skins.

**DERMAPORE Dressing**

Adhesive Dressing for Wound Care

- The air permeability and waterproofing property protects the wound from moisture and dirt.
- moderately soft dressing which can be applied to uneven areas of the skin.
- semi-transparent dressing allows inspection of the pad without the need for removal.

**Absorbent Pad**

**DERMA AID**

- Absorbent Pad for Wound
- 18 times the absorption power of gauze. Can be used on high exudates wounds.
- Non-adherent films, which easily adhere to the wound surface, are applied to both sides of the pad.
- Each pad/pack is sterilized.

**Film Dressing**

**MULTI FIX**

Surgical Film with Air Permeability and Waterproofing Property

- The air permeability and waterproofing property do not permit penetration of water and external contamination.
- Transparent film enables easy follow-up observation of the wound.
- No.3 is large enough to cover KARAYAHESIVE C-3, while No.5 is for KARAYAHESIVE C-6.

**Fixation Material**

**DERMAPORE**

Air Permeable Waterproof Elastic Adhesive Bandage

- The air permeability and waterproofing property do not permit penetration of water and external contamination.
- The extra thin bandage fits uneven sites because of its excellent elasticity in semi direction.
- A semi-transparent film enables easy follow-up observation of the wound.

**Silkyapore**

Flexible Adhesive Gauze Bandage

- perforated mesh in combination with a non-woven pad allows uninterrupted breathing of the skin.
- moderately soft product which is easily applied to bending joints.
- Available in two colors to suit the application and the affected area.

**Wound Care Products**

**Hydrocolloid Dressing**

- Transparent film enables easy follow-up observation of the wound.
- It can not slip even if it is applied to the joints or the parts with uneven surfaces because of appropriate flexibility and adherence.
- Appropriate absorbing exudate reduces maceration of normal skin.

**Non-Adherent Pad**

- Proven pad without the need for removal.
- Non-adherent films, which easily adhere to the wound surface, are applied to both sides of the pad.

**Adhesive Island Dressing**

**MULTI FIX**

Pad Attached Air Permeable/ Waterproof Film Dressing

- The flexible backing film enables tight application without being wrinkled. Contamination from the outside and the effects of moisture are effectively blocked.
- Once the rayon pad absorbs the exudate, it curls to prevent its pad from adhering to the wound surface.
- The transparent adhesive part enables easy observation of the absorbed exudate.

For the medical staff and the patients who seek for Best Medical Care, ALCARE takes a proactive stance on a broad range of issues in various clinical fields.

During / After Operation Management Solution

- Providing optimum materials for prevention and treatment
- Pursuing a total support of blood flow care
- Realizing best care by providing a large variety of products

Wound Care Solution

- Hydrocolloid Wound Dressing (KARAADHESIVE)
- Drainage after Operation (SURGDRAIN ZIPPER)
- Pad Attached Air Permeable / Waterproof Film Dressing (MULTI FIX-PAD)
- Protective Pad for Wound (DERMA AID)
- Flotation Pad for Decubitus Prevention (BONMAT)

Compression & Graduation Care Solution

- Medical Stocking (ANSILK-PRO J CALF STOCKINGS)
- 100% Cotton Elastic Bandage (ELASCOT)
- Pad for Compression (CG PAD)
- Medical Stocking (ANSILK PRO CALF STOCKINGS)
- Medical Stocking (ELASCOT)

Bandage Care Solution

- Elastic Adhesive Bandage (PRESNET)
- Elastic Hot Bandage (ELATEX)
- Flexible Adhesive Gauche Bandage (SILKYPRE)
- Air Permeable Waterproof Elastic Adhesive Bandage (DERMAPORE)

Incontinence Care Solution

- Male Incontinence Appliance (YUNION)

Orthopedic Care Solution

- Glass Fiber Casting Tape (CASTLIGHT)
- Plaster of Paris Bandage (PLASPLUN)
- Water-Activated Glass Fiber Splint (LIGHT SPLINT)
- Medical Stocking (ANSILK-PRO J CALF STOCKINGS)

Sports Care Solution

- Rib Belt (BUSTBAND-ACE)
- Lumbar Supporter (SACRO LIGHT)
- Ankle Guard (ANKLEGUARD
- Anklet Guard (ANKLEGUARD)
- Lumber Guard (LUMBAR GUARD)
- Knee Guard (KNEE GUARD)
- Reguard Skin Care (REGUARD SKIN CARE)

Stoma Care Solution

- Male Incontinence Appliance (YUNION)
- One-Piece Ostomy System (YOUCARE Z)
- Two-Piece Ostomy System (PROCARE 2 Fa, PROCARE 2 C)

Supporting improvement of ostomates' QOL

Optimum products for the period from treatment to rehabilitation

ALCARE’s “Solution”

for all the people hoping for health
